JURISDICTIONAL DETERMINATION

U.S. Army Corps of Engineers

DISTRICT OFFICE: Omaha District Denver Regulatory Office

FILE NUMBER: 200480534

PROJECT LOCATION INFORMATION:

State: Colorado County: Weld

	nter coordinates of site (latitude/longitude): 40 03 06.5909, 104 50 18.6038
	proximate size of area (parcel) reviewed, including uplands: 1600 acres
	ne of nearest waterway: South Platte River
Naı	ne of watershed: Middle South Platte-Cherry Creek
	VOUTE ON A PRINTED AND A PROPERTY OF THE PROPE
	OICTIONAL DETERMINATION
Coi	mpleted: Desktop determination
	Site visit(s)
T	Sallational Distance transfer (ID)
Jur	isdictional Determination (JD):
	Preliminary JD - Based on available information, \(\subseteq \text{there appear to be (or)} \subseteq there appear to be no "waters of the Unit of State".
	United States" and/or "navigable waters of the United States" on the project site. A preliminary JD is not appealable
	(Reference 33 CFR part 331).
\boxtimes	Approved JD – An approved JD is an appealable action (Reference 33 CFR part 331).
	Check all that apply:
	There are "navigable waters of the United States" (as defined by 33 CFR part 329 and associated guidance) within
	the reviewed area. Approximate size of jurisdictional area: There are "waters of the United States" (as defined by 33 CFR part 328 and associated guidance) within the
	reviewed area. Approximate size of jurisdictional area: 100 acres
	There are "isolated, non-navigable, intra-state waters or wetlands" within the reviewed area.
	Decision supported by SWANCC/Migratory Bird Rule Information Sheet for Determination of No.
	Jurisdiction.
	Jurisdiction.
BASIS	OF JURISDICTIONAL DETERMINATION:
A.	Waters defined under 33 CFR part 329 as "navigable waters of the United States":
	The presence of waters that are subject to the ebb and flow of the tide and/or are presently used, or have been used in
	the past, or may be susceptible for use to transport interstate or foreign commerce.
В.	Waters defined under 33 CFR part 328.3(a) as "waters of the United States":
	(1) The presence of waters, which are currently used, or were used in the past, or may be susceptible to use in
_	interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide.
\boxtimes	(2) The presence of interstate waters including interstate wetlands ¹ .
	(3) The presence of other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats,
	sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds, the use, degradation or
	destruction of which could affect interstate commerce including any such waters (check all that apply):
	(i) which are or could be used by interstate or foreign travelers for recreational or other purposes.
	(ii) from which fish or shellfish are or could be taken and sold in interstate or foreign commerce.
_	(iii) which are or could be used for industrial purposes by industries in interstate commerce.
	(4) Impoundments of waters otherwise defined as waters of the US.
\bowtie	(5) The presence of a tributary to a water identified in (1) – (4) above.
	(6) The presence of territorial seas.
_	(7) The presence of wetlands adjacent ² to other waters of the US, except for those wetlands adjacent to other wetlands

(7) The presence of wetlands adjacent² to other waters of the US, except for those wetlands adjacent to other wetlands. **Rationale for the Basis of Jurisdictional Determination (applies to any boxes checked above).** *If the jurisdictional water or wetland is not itself a navigable water of the United States, describe connection(s) to the downstream navigable waters. If B(1) or B(3) is used as the Basis of Jurisdiction, document navigability and/or interstate commerce connection (i.e., discuss site conditions, including why the waterbody is navigable and/or how the destruction of the waterbody could affect interstate or foreign commerce). If B(2, 4, 5 or 6) is used as the Basis of Jurisdiction, document the rationale used to make the determination. If B(7) is used as the Basis of Jurisdiction, document the rationale used to make adjacency determination:*

The South Platte River is an interstate waters. Wetlands: W-R1, riparian along the South Platte River; W-R2, in a diversion ditch to the South Platte River; W-R3, in a tributary that flows to the South Platte River that has had the hydrology temporarily removed from this tributary by ongoing upstream mining; W-MC1 South Platte River riparian wetland; W-MC2, flows to the South Platte River; W-A1, South Platte River riparian wetland; W-N1, Big Dry Creek riparian wetlands that flows to the South Platte River; W-N2, saline marsh that flows to the South Platte River; W-C1, South Platte River riparian wetland; W-C2, wetland tributary to the South Platte River; W-C4 and W-C6, Big Dry Creek riparian wetlands; W-C7, adjacent to former channel, separated by a man made dike, of and now a tributary to Big Dry Creek; W-C8, in a depression along and connected to Big Dry Creek; W-C10, Big Dry Creek riparian wetlands; W-MYR1, Big Dry Creek riparian wetlands and a tributary to Big Dry Creek; W-DS1, South Platte River riparian wetlands; W-DS2, Big Dry Creek riparian wetlands

	Extent of Jurisdiction: (Reference: 33 CFR parts 328 and 329)
\bowtie	Ordinary High Water Mark indicated by: High Tide Line indicated by:
	clear, natural line impressed on the bank
	the presence of litter and debris fine shell or debris deposits (foreshore)
	□ changes in the character of soil □ physical markings/characteristics □ destruction of terrestrial vegetation □ tidal gages
	shelving other:
	other:
_	
	Mean High Water Mark indicated by:
\square	survey to available datum; physical markings; vegetation lines/changes in vegetation types. Wetland boundaries, as shown on the attached wetland delineation map and/or in a delineation report prepared by:
	Warren R. Keammerer
	Water K. Keminieter
Basis Fo	r Not Asserting Jurisdiction:
\boxtimes	The reviewed area of MFM Farms consists entirely of uplands with non-jurisdictional irrigation laterals built entirely
on dry la	
	Unable to confirm the presence of waters in 33 CFR part 328(a)(1, 2, or 4-7).
	Headquarters declined to approve jurisdiction on the basis of 33 CFR part 328.3(a)(3).
	The Corps has made a case-specific determination that the following waters present on the site are not Waters of the United States:
	Waste treatment systems, including treatment ponds or lagoons, pursuant to 33 CFR part 328.3.
	Artificially irrigated areas, which would revert to upland if the irrigation ceased.
	Artificially irrigated areas, which would revert to upland if the irrigation ceased. Artificial lakes and ponds created by excavating and/or diking dry land to collect and
	retain water and which are used exclusively for such purposes as stock watering, irrigation, settling basins, or
	rice growing.
	Artificial reflecting or swimming pools or other small ornamental bodies of water created
	by excavating and/or diking dry land to retain water for primarily aesthetic reasons. Water-filled depressions created in dry land incidental to construction activity and pits excavated in dry land for
	Water-filled depressions created in dry land incidental to construction activity and pits excavated in dry land for the purpose of obtaining fill, sand, or gravel unless and until the construction or excavation operation is
	abandoned and the resulting body of water meets the definition of waters of the United States found at 33 CFR
	328.3(a).
	Isolated, intrastate wetland with no nexus to interstate commerce.
	Prior converted cropland, as determined by the Natural Resources Conservation Service. Explain rationale:
	Non-tidal drainage or irrigation ditches excavated on dry land: W-C11 terminates in upland
	Other (explain): W-A2, neither adjacent to nor surface connected to a waters of the U.S. (isolated); W-A3,
	isolated stock pond excavated in upland; W-N3, isolated; W-N4 with open water, excavated for gravel and stock watering; W-C3, isolated; W-C5, artificially irrigated; W-C9, isolated; W-C11 (irrigation ditch
	constructed on dry land); W-C12 isolated and down gradient of irrigation ditch W-C11; W-C13, isolated; W-
	DS3 and W-DS4 with open water, isolated active gravel mining activity; W-DS5, isolated and active gravel
	mining activity; W-DS6, a ditch that flows to <u>non-jurisdictional irrigation ditch W-DS7</u> ; W-DS7, irrigation ditch
	that terminates in upland; W-DS8, a ditch that flows to W-DS7; W-DS9, adjacent to W-DS7
DA	TA REVIEWED FOR JURSIDICTIONAL DETERMINATION (mark all that apply):
	Maps, plans, plots or plat submitted by or on behalf of the applicant.
$\overline{\boxtimes}$	Data sheets prepared/submitted by or on behalf of the applicant.
	This office concurs with the delineation report, dated October, 2004 , prepared by: Keammerer Ecological
Consult	ants, Inc.
	Data sheets prepared by the Corps.

¹Wetlands are identified and delineated using the methods and criteria established in the Corps Wetland Delineation Manual (87 Manual) (i.e., occurrence of hydrophytic vegetation, hydric soils and wetland hydrology).

²The term "adjacent" means bordering, contiguous, or neighboring. Wetlands separated from other waters of the U.S. by man-made dikes or barriers, natural river berms, beach dunes, and the like are also adjacent.
